Re: Bond Release, Kelmine Corporation, Cub Mine, M/037/044, San Juan County, Utah

Thank you for your letter received January 17, 1995 regarding the reclamation status of the Cub Mine. We appreciate you notifying us that U.P. & L has removed the power pole at the site and that the vent shaft access road has been properly bermed. Has the road been adequately reclaimed, i.e. ripped, scarified and reseeded?

Before the surety can be fully released, we will need to perform an inspection of the site. We will plan on doing an inspection this spring as soon as weather permits. If you wish to attend the inspection, please contact me to schedule a convenient date and time.

Sincerely,

A handwritten signature in cursive script, reading 'Anthony A. Gallegos'.

Anthony A. Gallegos

Re: Cub Mine Bond Release, M/037/044, San Juan County, Utah

Dear Mr. Swanson:

Thank you for your letter dated August 17, 1993, explaining the status of the outstanding reclamation issues at the Cub site.

Please notify the Division when the UP&L power pole has been removed and the vent shaft access road reclaimed.

The 1950 decline falls outside the permitted area of the Cub mine, so the state has no jurisdiction to require reclamation. However, because it presents a safety hazard, it would be prudent for the claim holder to either reclaim it or gate/barricade it.

Sincerely,

Holland Shepherd  
Senior Reclamation Specialist

AN EARTHEN/ROCK BEAM WAS PLOWED UP AT TOP END OF ROAD  
WHERE A VEHICLE CAN NOT GET AROUND IT. A SECOND EARTHEN  
BEAM WAS PLOWED UP FROM ROAD MATERIAL AT LOWER/MID  
POINT ON ROAD, AGAIN SO NO VEHICLES COULD GET BY IT.  
BOTH BEAMS WERE PLACED WITH A CAT & ARE 8-10 WIDE X  
3-4 FEET HIGH. UP&L HAS REMOVED THE POLE AT THE SITE

M.R. Swanson
